Add: Provincial Motive Fuel Tax	<u>15.5</u>		- see Note 9 below
Equals: Wholesale Selling price (rounded)	13	130.91	
		2	
	Minimum	Maximum	
Add: Retail Mark-up	5.4	7.4	- see Note 10 below
Add: Mark-up Adjustment	0.3	0.3	- see Note 11 below
Add: HST (15%)	20.49	20.79	1
Equals: Pump Price	157.1	159.4	1

Benchmark price changes during the period:

The most significant changes in weekly pump prices occur as a result of (1) changes in the NYMEX market price for gasoline (not crude oil), and (2) changes in the value of the Canadian dollar. The table above attempts to show the net effect of each component over the pricing period.

While crude oil and gasoline are related products they are subject to different supply and demand influences and thus their market prices can change very differently in any given pricing period. The more accurate gasoline market values are used for setting pump

Notes:

1	Benchmark price is the average of the daily average NYMEX market price for refined gasoline for the last pricing period (Thursday to the following Wednesday) stated in Canadian dollars. This analysis is prepared by Board staff weekly based on the formula above, using mandated sources of data.	
2	NYMEX is the abbreviation for the New York Merchantile Exchange. It is the closest and most relevant market for gasoline trading in North Eastern North America.	
3	Forward averaging is a correction or "trueing up" to account for the difference between historical numbers used to set the price and the actual price for the period. On a weekly basis the Board has discretion on whether to use this mechanism and the magnitude that is applied. More on Forward averaging is available at:	Click Here
4	Transportation adjustment is the amount included to account for shipping costs to move the product from the refinery or tank farm to the retail station. It varies by zone, and a hearing is required to amend it. More on the transportation allowance can be found in the Board's 2006, 2011 and 2016 Decisions:	2006 Decision 2011 Decision 2016 Decision
5	Carbon Charge is the Federal Carbon charge (Carbon Tax)	PPP Regs
6	Clean Fuel Adjustor, is to provide an allowance to cover the cost of complying with the Federal Clean Fuel Regulations	Press Release 2024 Order
7	Wholesale margin is a fixed amount included in the price to cover wholesalers' costs and permit a reasonable profit. A hearing is required to amend the margin. More information on the wholesale margin can be found in the Board's 2006, 2012, 2021, and 2023 Decisions.	2006 Decision 2012 Decision 2021 Decision 2023 Decision
8	Federal Excise Tax is the amount of tax set by the Government of Canada.	
9	Provincial Motive Fuel Tax is the amount of tax set by the Province of Nova Scotia and is primarily used for highway maintenance.	
10	Retail margin is the variable amount allowed to retail station operators to cover their costs and permit a reasonable profit. There is a minimum and maximum retail margin to allow for some flexibility and competition. A hearing is required to amend the margins. More information on retail margins can be found in the Board's 2006, 2011, 2016, and 2021 Decisions:	2006 Decision 2011 Decision 2016 Decision 2021 Decision
11	A retail mark-up adjustment is being applied for the increased cost of credit card fees charged to retailers	2022 CC fee Order
12	Some figures are rounded to One Hundredth of a cent (Benchmark, Wholesale Selling Price) while the Pump Price is rounded to the tenth of a cent. Sections 16, 17, and 18 of the Regs deal with how these line items are to be expressed:	PPP Regs

Sections 16, 17, and 18 of the Regs deal with how PPP Regs	-		
Provincial Motive Fuel Tax is the amount of tax set by the Province of Nova Scotia and is primarily used for highway maintenance. Retail margin is the variable amount allowed to retail station operators to cover their costs and permit a reasonable profit. There is a minimum and maximum retail margin to allow for some flexibility and competition. A hearing is required to amend the margins. More information on retail margins can be found in the Board's 2006, 2011 and 2016 Decisions: A retail mark-up adjustment is being applied for the increased cost of credit card fees charged to retailers Some figures are rounded to One Hundredth of a cent. (Benchmark, Wholesale Selling Price) while the Pump Price is rounded to the tenth of a cent. Sections 16, 17, and 18 of the Regs deal with how PPP Regs	8	reasonable profit.
